

HLK Whitehouse Stereo Image Library Species Lists

Each stereo slide is unique, with its own code number and handwritten details. I have transcribed these as best as I can, and included them in the lists of species given below. Inevitably there will be some errors in my transcription of locality details with which I am unfamiliar. There may also be some errors of identification. Nomenclature and authorities follow 'A Check-list and Census Catalogue of British and Irish Bryophytes' T L Blockeel & D G Long (1998) with the exception of *Zygodon viridissimus* var. *lingulatus* (J.Bryol 22:35-42).

Jonathan Sleath

The lists below contain details of species, locality and date for the three categories:

[Hepatics](#)

[Mosses](#)

[Non-UK species](#)

Finally, those species which have a photomicrograph of gemmae are listed, together with any details that were provided. Usually there is no scale. Please note that where images of gemmae appear on the same page as the whole plant, the gemmae seen will almost certainly be from a different specimen.

[Gemmae](#)

Hepatics

Species name	Locality	Date	HLKW code	Det
<i>Acrobolbus wilsonii</i>	Bengower, Connemara	21.7.94	150/5A	JAP
<i>Adelanthus decipiens</i>	Le Gouffre, Foret de Huelgot, Finistere	5.4.93	127/7A	
<i>Adelanthus lindenbergianus</i>	Benbreen, Connemara	21.7.94	150/4A	
<i>Anastrepta orcadensis</i>	Hecla, S Uist	11.8.92	113/3A
