

A Census Catalogue of British and Irish Bryophytes 2021

by T.L. Blockeel, N.G. Hodgetts, S.L. Pilkington and O.L. Pescott

The British Bryological Society is excited to announce the forthcoming publication of its latest *Census Catalogue*. For those who are unfamiliar with this, it lists – for each species or taxon – the Watsonian vice-counties in which it has been recorded, and is a useful tool for regular recorders.

The last full catalogue was printed in 2008 (*A Checklist and Census Catalogue of British and Irish Bryophytes – Updated 2008*) and since then there have been numerous changes to the nomenclature and systematics of our bryophytes, in many cases prompted by molecular studies. Almost 40 mosses and liverworts have also been added to the British and Irish list in the intervening years.

With the publication of a new bryophyte checklist for Britain and Ireland in 2021, this new edition of the *Census Catalogue* reflects current bryophyte nomenclature and incorporates the numerous updates to the known distribution of our bryophytes at a local level up to and including 2020.

The *Census Catalogue* is A5 in size and softback. Please reserve your printed copy/ies using the order form below or via the BBS website www.britishbryologicalsociety.org.uk. Publication is expected in late 2021.
